

## Notable Tide Times on the River Orwell 2018

At high tide on the estuary, Trimley Marshes reserve swells with waterfowl and waders, all seeking rest and preening time, or additional time to feed while the estuarine mudflats are covered. Flocks fly to the floods and lagoons in large numbers up to an hour or two before high water. It can be a wildlife spectacle to remember.

All days shown below have larger predicted tides over 4 metres. Days where high tides exceed 4.2 metres are shown in **green**. These often produce the very best roost movements on the reserve, particularly in autumn and winter months. All times have been corrected for British Summer Time (BST) where appropriate.
